

ChalkFree

Teaching takes energy.
ChalkFree helps you spend
it where it counts.

What is ChalkFree?

The digital-first teaching era is here. ChalkFree is a teacher-first initiative built around one idea: the tools should serve the teacher, so the teacher can be fully present with students.

Instead of one more pile of resources to sort through, ChalkFree surfaces a small, deliberate set of tools, videos, and ideas — organized around your actual day: before class, during class, after class.

Who is it for?

K–12 teachers
who want lessons that
pull students in, not
push tools at them.

Busy educators
short on time who
want ideas they can
use this week.

**New to OneScreen or
touchscreens** — teachers who
want a fast, plain-language
way to get started with what's
on the wall.

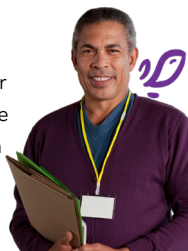

What you'll find inside

- **Short videos** on using touchscreens & apps in real teaching moments
- Simple setup and connection guides
- Ready-to-use lesson ideas and templates
- “Try this on Monday” ideas, not just feature tours
- Collaboration and sharing guides
- Examples of how other teachers are running ChalkFree lessons with their classes

How ChalkFree helps teachers

Before class:

Get set up without the scramble — organize your files and lessons and have them ready on the screen when students walk in.

During class:

Stay with your students, not the tech — pull in what you need, mark it up together, and keep the lesson moving.

After class:

Close the loop fast — save and share your work, and turn it into something students can study from.

Get Started Now

- Visit chalkfree.com or scan the QR code.
- Choose the stage you're in: Before, During, or After class.
- Pick one idea, try it in your next lesson, and see how “ChalkFree” feels.

Why ChalkFree?

- ✓ **Fast** – No digging through manuals or long courses
- ✓ **Always there** – Learn on your own time, at your own pace
- ✓ **Real** – Built around how you prep, teach and wrap up – not generic tech training
- ✓ **Simple** – plain-language guides and short videos
- ✓ **Easy wins** – Ideas you can use this week, not someday
- ✓ **Open to all** – (no credit card required)

OneScreen also makes a few free apps some teachers fold into their day — like Lessn, QuizWiz, Scribe, and SuprNotes. Use what helps; skip what doesn't.

Lessn – Turn your existing materials into complete, interactive lessons in minutes - lessn.ai

Scribe – Live captions, translation and transcripts to support every student - onescreensolutions.com/scrybe/

QuizWiz – Generate quizzes, checks for understanding and lesson absorption instantly - quizwiz.onescreensolutions.com

SuprNotes – Smart notes and summaries so you can focus on teaching, not typing - suprnotes.ai

Every tool and video on ChalkFree earns its place by one test: does it bring you closer to your students, or just add another thing to manage? If it doesn't pass, it's not here.

ChalkFree is new — and we'd love your feedback! Try it out and tell us what works.
